Inclusive Innovation Policy Toolkit

The OECD's Inclusive Innovation Policy Toolkit is a practical and interactive guide developed to aid policy makers design and implement effective innovation policies for inclusive growth. It provides a set of examples of inclusive innovation policies implemented in different countries. [Find more information here.](#)

The contents of this toolkit are based on Pinar Satorra, S. and C. Pissone (2017) 'Inclusive Innovation Policies: Lessons from International Case Studies', OECD Science, Technology and Industry Working Papers, No. 2017/02, OECD Publishing, Paris.

What are inclusive innovation policies?

Inclusive innovation policies are defined as innovation policies that aim to remove barriers to the participation of under-represented individuals, social groups, firms, sectors and regions in innovation, research and entrepreneurship activities. Their goal is that all segments of society have opportunities to successfully participate in and benefit from innovation. They contribute explicitly to one or more of the following objectives:
