

## Developments in the Teaching of Entrepreneurship in European Transition Economies (Entrepreneurship and Higher Education)

The aim of this chapter is to map the current situation in the entrepreneurship education of 22 European transition economies and to develop a shared source of data on entrepreneurship education in the region. The analysis covers 774 higher education institutions from the region, of which 363 had entrepreneurship-oriented courses, modules or curricula. The creation of entrepreneurship profiles in the schools as well the level of teaching is analysed. The chapter also identifies examples of the best practice in entrepreneurship teaching from the three viewpoints: how the specialised units co-ordinating teaching and research of entrepreneurship are designed; the best examples of curricula; and the level of internationalisation of the programmes offered in these schools.
