

Regulatory structures and their reform in Colombia (OECD Review of Telecommunication Policy and Regulation in Colombia)

Chapter 2 examines the design of the institutional framework for telecommunication policy and regulation, which was recently reformed (2009). Most regulatory instruments used in OECD countries are present in Colombia's legal framework, even though some have never been used. The chapter presents recent developments in the areas of ex-ante regulation, competition law, interconnection, universal service, spectrum policy and consumer protection, as well as the new challenges posed by convergence.
