

## Open government policy implementation in Mexico (Open Government Data Review of Mexico: Data Reuse for Public Sector Impact and Innovation)

This chapter assesses the implementation of open government policies in Mexico, with a specific focus on their steering and co-ordination from the centre of government (CoG). The creation of the Tripartite Technical Secretariat, which oversees the country's Open Government Partnership process, was an important step towards the design and implementation of a whole-of-government approach to open government. Under its leadership, Mexico has elaborated an ambitious second Open Government Partnership Action Plan which includes transformative commitments with great potential impact and which was monitored in a transparent way through the Open Government Dashboard.
