

## Intellectual property use in Malaysia: Statistics (Boosting Malaysia's National Intellectual Property System for Innovation)

This chapter provides an overview of the available statistical evidence on the use of intellectual property (IP) in Malaysia. It compares Malaysia's performance to that of other economies, including neighbouring member countries of the Association of Southeast Asian Nations (ASEAN). The chapter analyses the uptake of different types of IP in Malaysia and their use: patents, utility models, trademarks, industrial designs, geographical indications and copyrights.&#xD;
