

Daily Healthcare Services Development & Demonstration Project

Benefits of participating a demonstration project

As Personalized Wellness Care being a growth engine and as intelligent IoT being a platform, this project has been brought to itself through K-ICT strategy

19 Future Growth Engine Industry

Growth Engine	5G Mobile Network	VR Contents	Deep Sea Plant	Platform	Intelligent Semiconductor	Converging Materials
	Smart Automobile	Renewable Energy Hybrid	Intelligent Robot		Intelligent IoT	Big Data
	Disaster & Safety Mgmt.	Personalized Wellness Care	Wearable Smart Device			

K-ICT's Core Strategy

Personalized Wellness Care

Intelligent IoT

Daily Healthcare Service
Demonstration Project

Project Overview

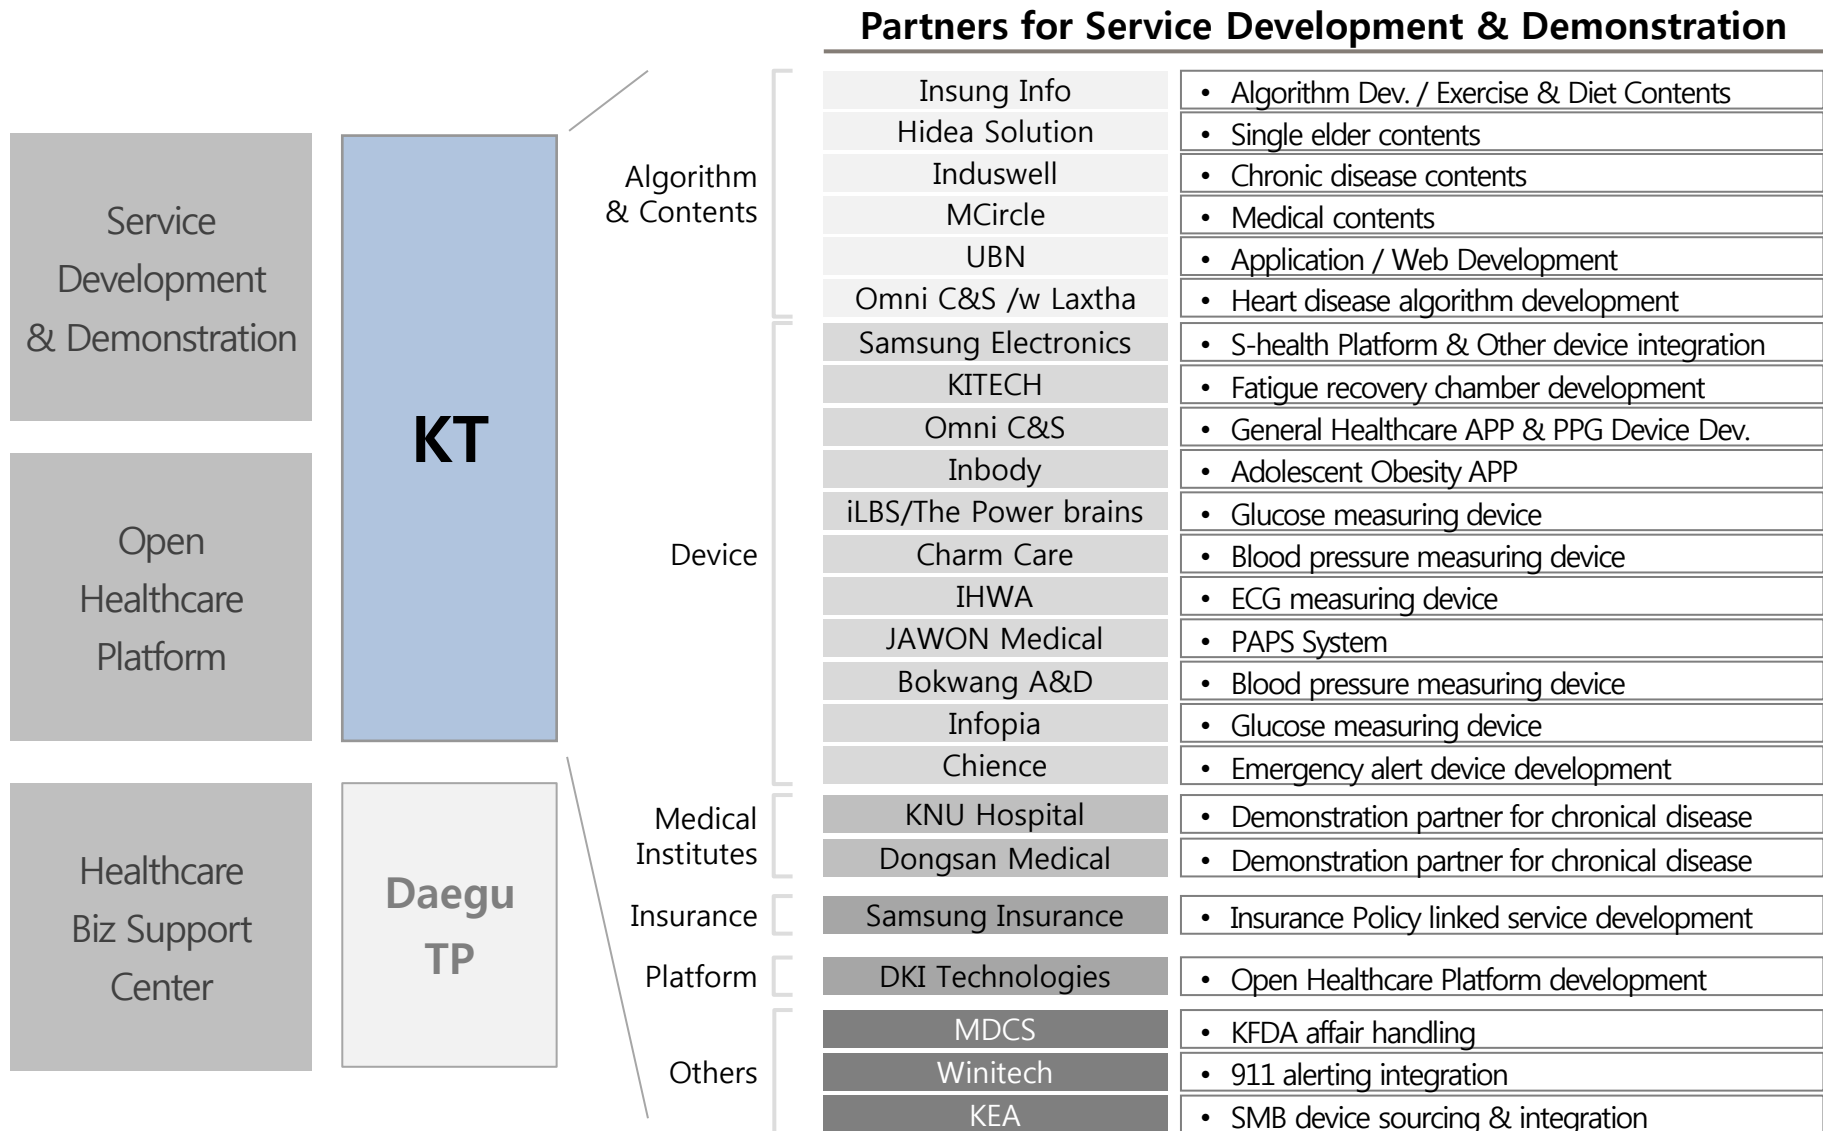

To promote wearable based Personal Healthcare Services market and
to nurture Small-Medium-Businesses in this sector

Goal	Through implementing demand-supply linked Healthcare Demonstration Site, “Improve public’s QoL and promote IoT based healthcare industry”		
Description	Based on MISP’s IoT + Mobile convergence strategy, evaluate feasibility of Personal Healthcare Service (PHS)		
Budget	USD 20 M over 3 years (1 st Year: 8.5M / 2 nd Year: 6.8M)		
Demonstration Period	May 2016 ~ December 2017		
Project Scope	Service Development & Demonstration	Open Healthcare Platform	Healthcare Biz Support Center

Participants of the Project

Created a foundation of ecosystem of mutual benefits among participants

Services Deliverables in 2015 Overview

Six services were developed and 2,700 participants are trying it out since Nov. 2015

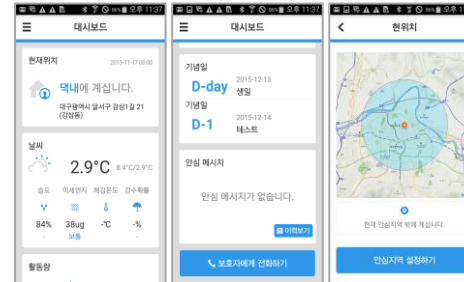

Demo. Services	General Healthcare	Chronic Disease Mgmt.	Adolescent Obesity Mgmt.	Emergency Alert	Air Force Fatigue Recovery	Int'l Collabo. Diagnosis
Desc.	Exercise, Diet, Sleep & Stress Mgmt.	Blood Pressure, Glucose Tracking	Strength, Obesity Management	Emergency Monitoring & 911 Alerting	Chamber for Fatigue Recovery	Collaboration btw Hospitals
TAM	General Public	Hypertension, Diabetic Patients	Middle School Students	General Public over 60s	Air Force Pilots	Hypertension Patients in Vietnam
Partici- pants	Daegu City Citizen (1,000)	KP National Hospital Dongsan Medical (950)	Sanguck Mid. School (500)	Lotus Village The-K 3 rd Age (200)		Vietnamese Hospitals with KP Nat'l Hospital (50)
Demo. Period	Nov. 2015 ~ Nov 2016					
Platform	Open Healthcare Platform					

Services Deliverables in 2015

국내 최초 IoT 기반 헬스케어 실증서비스 개시

ADT와 유로스타를 통한 헬스케어 솔루션 소개

국내 최초 **신트렌드(NTT)** 기반 헬스케어(Daily Healthcare) 실증서비스에 대해서가 시작됐다.

신트렌드의 진실, YBM

신트렌드는 YBM의 주요경영체로 헬스케어 분야에 실증 단지 조성사업과 병원 운영사업에 대해 함께 모두 시작됐다 2018년 7월이다.

대구가톨릭대학교를 중심으로 한 헬스케어 분야에 실증 단지 조성사업과 병원 운영사업에 대해 함께 모두 시작됐다 2018년 7월이다.

대구가톨릭대학교를 중심으로 한 헬스케어 분야에 실증 단지 조성사업과 병원 운영사업에 대해 함께 모두 시작됐다 2018년 7월이다.

건강 지키고 중소기업 키우고...공급망은 헬스케어 구현

IoT 실용사업 대표 사례 연구-중소기업에 대량인 헬스케어

▲중소기업 가자

© 2015.1

최근 우리 사회의 특징 중 하나는 고령화와 건강에 대한 관심이 많이 높아져 있다는 점이다. 이는 공 의료 서비스, 특히 정보통신기술(ICT)을 활용해 대·중·소 의료 간격을 완화하는 스마트 헬스케어의 수요를 자극하고 있다. 가령이해 따르면, 전 세계 치과처럼 헬스케어 시장 규모는 2013년 16억 7천만 달러(1조7,000억 원)에서 2016년에는 50억 달러(약 5조3,000억 원)에 3배 이상 증가할 전망이다.

이러한 점을 고려할 때 4년 전부터 ICT를 접목한 국내 중소기업을 중심으로 전진하고 있는 스마트 헬스케어 대량인 헬스케어(Daily Healthcare) 실용사업은 주목 받을 만 하다.

국내에서도 IoT 분야를 담당 ICT 서비스를 줄 하나인 헬스케어 산업 생태계를 위해 ICT 융합형 기술과 서비스 등 신사업을 육성할 필요성이 시급하다.

하지만, 현재 헬스케어 플랫폼은 의료용 양식과 저용량 센스 간 상호호환성이 부족해 사용이 제한되고, 병원 간 연계, 글로벌 제품·서비스 등에 어려움이 있는 것이 사실이다. 3년간 전진하는 스마트헬스케어의 헬스케어 실용단기사업은 이 같은 한계를 극복할 수 있는 효과적인 수단인

헬스케어 실용단기사업의 한 축은 글로벌 헬스케어 제품·서비스이다. 스마트폰과 중소기업에 헬스케어 제품·서비스 개발, 시험 등을 원스톱으로 지원한다. 또다른 축에는 국제의료 기기의 IoT 응용 제품 개발과 함께 플랫폼 개발을 통한 실용단기사업 연계, 전문기업 지원 등을 중점적으로 있다.

Feedbacks from stakeholders as well as onsite VoC are collected through large-scale demonstration and thus we were able to determine feasibility of services and risks

Hassel Free

“ This one wearable can do bio readings as well as exercises !! ”

“ Great to be able to measure free-weight exercises, like squart ”

“ Don't like to manually making inputs to the services ”

Want It Simple

“ Focused feature offering is better than diverse features ”

“ It was not easy to find right menu as it is too complex ”

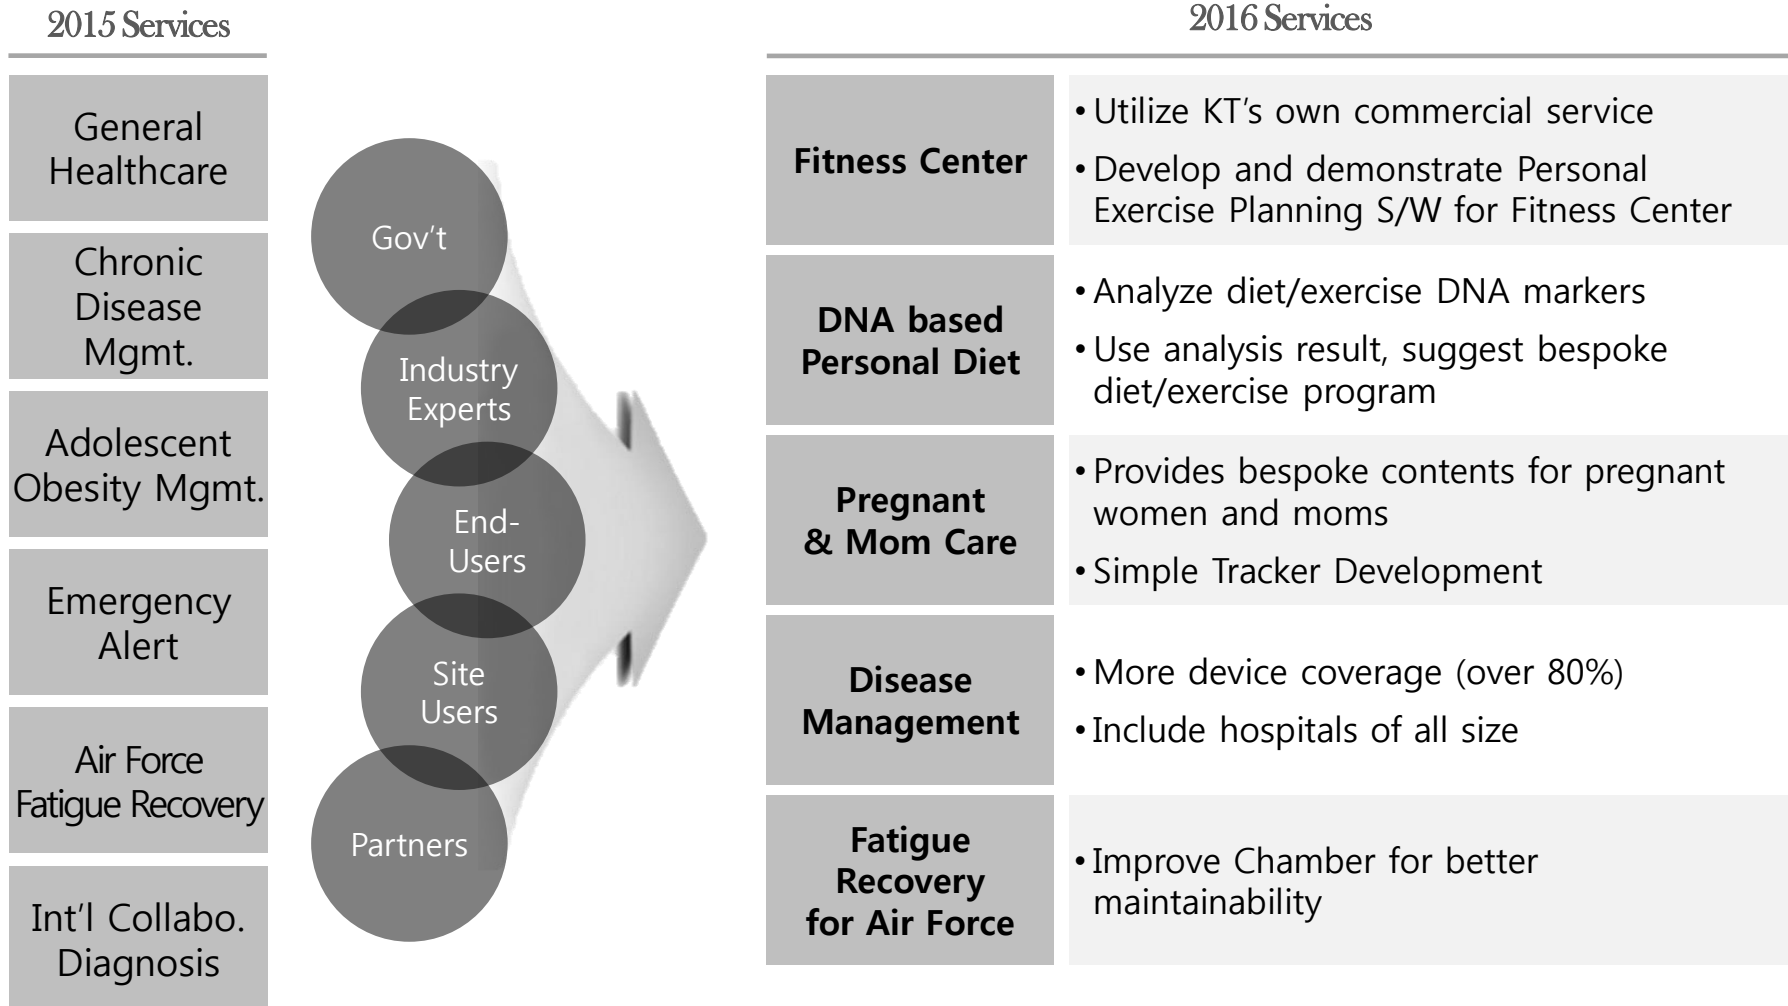

But in Control

“ I want to choose my program but not by watching ”

	Implications Deducted
General Healthcare	<ul style="list-style-type: none">• Sleep, Stress contents doesn't interest users• Focus on exercise monitoring• Not to dictate what user should do
Chronic Disease Mgmt.	<ul style="list-style-type: none">• Small/medium sized hospitals needs to be onboard• Automate as much input as possible for users• Focus on tracking record of measures from devices
Adolescent Obesity Mgmt.	<ul style="list-style-type: none">• Automate as much input as possible for users• Focus on obesity management functions
Emergency Alert	<ul style="list-style-type: none">• Minimum input as possible for users• Outdoor devices are not currently adequate
Air Force Fatigue Recovery	<ul style="list-style-type: none">• Simpler maintaining of chamber required• Consider use of chamber in different climates
Int'l Collabo. Diagnosis	<ul style="list-style-type: none">• Automate as much input as possible for users• Focus on tracking record of measures from devices

Demonstrations planned in 2016 has reflected feedbacks in 2015,
and thus we expect more services to be commercialized

Participating in a demonstration project, helps you to maintain business sustainability

Business & Service Development Transformation

1

Concrete feedbacks from demonstration with tangible services

2

Mitigate financial burden for devising and/or improving service

4

Improve Business Sustainability

3

Opportunity for foundation of mutually beneficial business ecology

User

- Narrow down to potential users
- What offerings make a satisfying user
- Filter out functions that we must or may or must not incorporate into services

Market

- Identify an effective channel partners
- What offerings make a satisfying user
- Outlines feasible approach to create new services & products

Technology

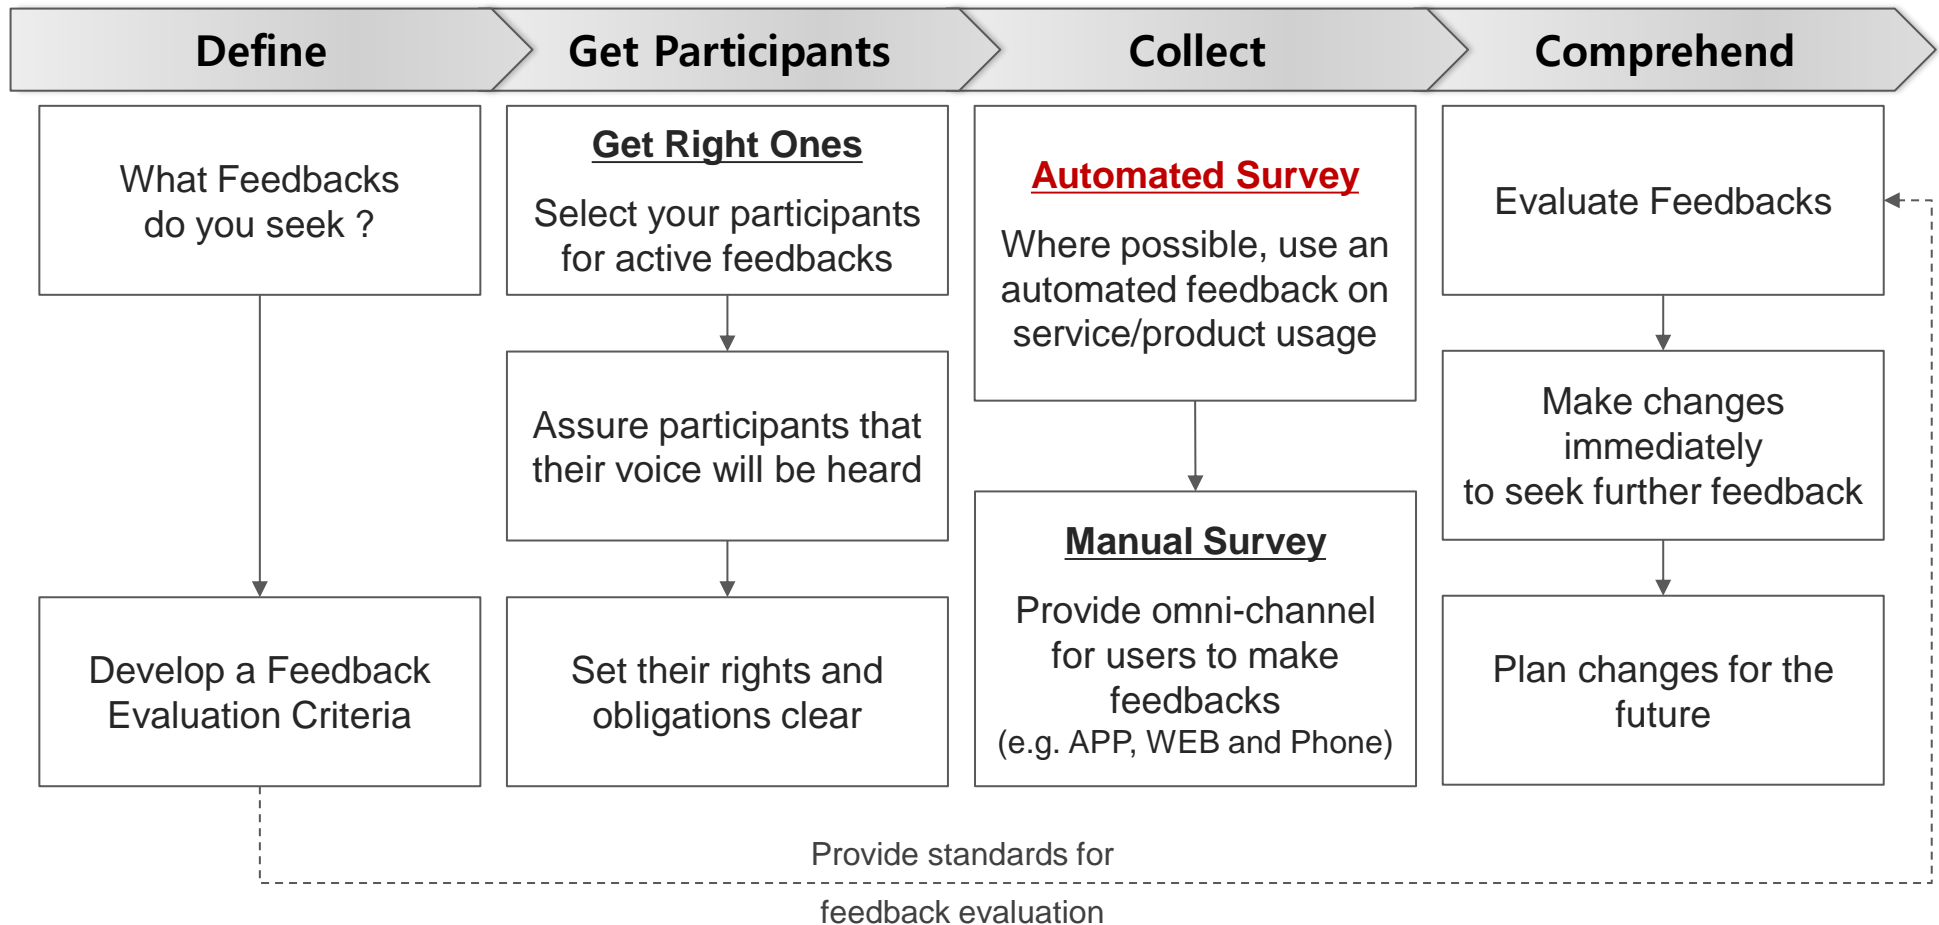

- Determine technological feasibility of key functions identified
- Better ways to apply technology e.g. Battery issues on real use of IoT
- Evaluate technological competitiveness

Cost & Risk

- Identify risks before the commercialization of product/service
- Cost effective development process
- SMBs should benefit from above

Managing Feedbacks

To ensure good feedback, not only need you to set your process right, but you also need to have right people participating in your demonstration projects

Thank you
