

Governance and implementation of innovation policies (The Innovation Imperative: Contributing to Productivity, Growth and Well-Being)

This chapter explores a number of issues that are key to the governance and implementation of innovation policies. The first section of the chapter focuses on how to improve multi-level governance, i.e. in aligning policy actions across different ministries, agencies and stakeholders, but also across different levels of governments and across borders. The second section focuses on questions of trust in policies related to innovation, including the role of public engagement and risk management related to innovation. The final section focuses on specific questions related to the implementation and evaluation of innovation policies, including how governments can overcome challenges related to the implementation of reforms.
