

The Innovation Policy Mix (OECD Science, Technology and Industry Outlook 2010)

In recent years, the concept of an innovation policy mix has become an increasingly popular way of thinking about the balance and coherence of the strategic tasks for policy and of the range of policy instruments deployed. This chapter further elaborates the concept and explores its utility for innovation policy assessment and design. The analytical framework outlined will be an important component of the new innovation policy handbook currently being prepared as a follow-up to the OECD Innovation Strategy.
