

## Fostering an organisational culture and ecosystem for open government data in Mexico (Open Government Data Review of Mexico: Data Reuse for Public Sector Impact and Innovation)

This chapter underlines how the Mexican government has taken important steps to set an ambitious open data policy and to develop institutional capacities for data disclosure. It also underscores that the sustainability of open data in Mexico will require synchronising public institutions' policies with the vision for open data set by the centre of government. A more dynamic involvement of key ministries in Mexico, drawing upon their role as actors within the national open data ecosystem, is necessary to reach user communities and to spur a demand-driven data disclosure.
