

Research excellence initiatives in Slovenia (Promoting Research Excellence: New Approaches to Funding)

This chapter reviews research excellence initiatives (REIs) in Slovenia. It discusses priority research and technology areas and measures adopted to build interdisciplinary research. The current CoE programme is Slovenia's largest and most concentrated investment in research and development (R and D). The mid-term evaluation of the programme found signs of progress in international scientific excellence and in linking different spheres of research. The Ministry of Education, Science and Sports plans further support for REIs as a result of the performance of the CoE programme.
