

Germany (The Call for Innovative and Open Government: An Overview of Country Initiatives)

Budget consolidation -which is also affecting Germany in the current legislative period- has also led to a reduction in budget funds for public authorities delivering public services. These necessary budgetary cuts will reduce the federal ministries' and their subordinate authorities' scope for action, adversely affect individual projects and heighten the need to set priorities. However, budget-neutral, internal postponements or financial shifts in expenditure will ensure that the implementation of projects which are important in policy terms are not put at risk.
