Governance and policy framework for open data in Mexico (Open Government Data Review of Mexico: Data Reuse for Public Sector Impact and Innovation)

This chapter discusses the policy, legal and governance framework for open government data in Mexico. It provides evidence on the ability shown by the institutions responsible for policy co-ordination to align high-level policy directives to overarching central policies such as the National Development Plan and the National Digital Strategy; and to use its international commitments to set an evolving road map for open data informed by best international practices.
